Website

Executive Profile

Supervisory-grade credit risk and regulatory finance specialist with 4+ years of on-site SSM inspection experience and emerging expertise in MiCA (Markets in Crypto-Assets Regulation) authorization frameworks. Has directly identified over €25M in under-provisioned exposures, recalibrated ECL methodologies at Top 10 Financial SIs, and currently navigates the full authorization lifecycle for CASPs, VASPs, and EMT issuers seeking European regulatory approval under MiCAR. Combines deep prudential expertise — spanning IFRS 9, Basel III/IV, IRB models, VaR quantification, and MiCAR compliance — with hands-on buy-side experience managing risk across an €8Bn multi-asset portfolio. Fluent in Python, SQL, and Bloomberg; targets senior roles in Private Credit, Regulatory Advisory, or Risk Management at asset management, alternative lending, or crypto-native financial institutions.

PROFESSIONAL EXPERIENCE

Supervisor — MiCAR Authorization (CASP / VASP / EMT)

BANK OF PORTUGAL ***2026 – Present (4-Months)***

Embedded within the MiCAR authorization unit, conducting end-to-end regulatory assessment for European financial institutions and crypto-native firms seeking CASP (Crypto-Asset Provider), VASP (Virtual Asset Service Provider) and EMT/EMIs (E-Money Token/E-Money Token Institutions) authorization under the Markets in Crypto-Assets Regulation (MiCAR/EU Regulation 2023/1114) – reviewing documentation, business model viability and financial resilience. Supported legacy financial institutions — banks, EMIs, and investment firms — navigating the transition from traditional TradFi operational models to MiCAR-compliant crypto-asset service provision, bridging prudential supervisory requirements (CRD/CRR) with the emerging MiCAR framework. Managed authorization pipeline for 4+ CASP/VASP entities.

On-Site Inspector – Credit Risk *(equiv. Senior Credit Analyst / Risk Officer)*

BANK OF PORTUGAL ***2022 – Present***

Challenge senior bank management and internal processes related with credit granting, IFRS9 classification, Provisioning process (totaling a € 40 million in under-provisioned exposures) and Estimation of Risk-Weighted Assets for Standardized Approach and IRB portfolio according to CRRII/III. In total, concluded 16 on-site inspections (which represent a total €201 billion assets reviewed), including:

- Audited the Risk-Weighted Amounts for an IRB portfolio according to CRR II (Basel III/IV) of a Portuguese Significant Institution with total assets of €102 billion resulting in an increase of € 210 million in RWA.
- Review Credit Granting, Governance Framework and Risk Appetite Framework for a Portuguese Significant Institution with total assets of €45 billion resulting in 3 findings which occurred in a reassessment of syndicated loan lending, risk appetite framework, CRE-refinancing methodologies, maturity concentration management and alignment with EBA Guidelines on Internal Governance and Loan Origination and Monitoring.
- Estimation and challenge of a Standardized Approach portfolio for 5 LSIs (Less-Significant Institutions) totaling €27 billion, resulting in a 10% increase in SA-RWA by misclassification of assets and misclassification of collaterals.
- Collective IFRS 9 and AQR assessment for a Portuguese Significant Institution with assets of €45 billion and a medium financial institution of €955 million. Audited the Exposure at Default models (Credit Conversion Factor, Behavioral Maturity, Probability of Full Redemption) for a Significant Institution with total assets of €45 billion.

Presentation in Bank of Portugal Day for a total of 800 attendees, representation of Bank of Portugal in Open Day for all Bank of Portugal Employees. Participation in Marketing Events related to new entrants.

On-Site Inspector – Credit Risk (equiv. Senior Credit Analyst / Risk Officer)

EUROPEAN CENTRAL BANK *(Luxembourg Based)* **Jan 2025 – Jun 2025 (6 Month secondment)**

- **Forensic Credit & Valuation Analysis:** Spearheaded a deep-dive review of a €32B Commercial Real Estate portfolio (Income-Producing Assets) for a Significant Institution in Luxembourg, focusing on the structural integrity of IFRS 9 classification, Staging Triggers, Provision Methodology in alignment with ECB's AQR-Manual Phase II approach. **Sector-Specific Due Diligence (CRE):** Executed a bottom-up asset quality review of a €4B Commercial Real Estate (CRE) portfolio comprised primarily of Offices, Logistics and Hospitality assets.
- **Cash Flow Modeling & Risk Quantification:** Architected a proprietary cash flow projection model in Excel to stress-test Cash-Flow Modelling, Debt Service Coverage Ratios (DSCR) and exit cap rates; identified a €25M provisioning deficiency due to uncaptured cap rate compression and aggressive risk quantification.
- **Strategic Risk Advisory:** Challenged Senior Management on Provisioning Methodology and riskier loan identification, resulting in three formal findings that forced a recalibration of the bank's Expected Credit Loss (ECL) estimation process.

Analyst – Asset Management

BANKINTER GESTIÓN DE ACTIVOS ***2021 – 2022***

- Executed deep-dive intrinsic valuations based on a fundamental equity valuation (€8Bn Portfolio) focusing exclusively on US-technological long positions with a proprietary DCF-estimation using exit multiples and terminal growth rate to bridge the gap between fundamentals and market pricing.
- Engineered an automated fund risk-monitoring in Excel + BQuant, measuring the Liquidity Coverage, High-Quality Liquid Assets and Net Stable Fund Ratio across funds.
- Constructed and calibrated a VaR back-testing framework across the full €8Bn portfolio, simulating performance under historical crisis scenarios (GFC, COVID-19, 2022 Rate Shock) to quantify tail-risk factor exposures; identified selective under-exposure to duration risk.
- Engineered the regulatory alignment of 5 Pension Fund totaling €8Bn of AUM mandates under SFDR Article 6, 8, and 9 categorizations, integrating qualitative ESG scoring rubrics into the core investment framework and ensuring MiFID II-consistent disclosure documentation for institutional investors.

Researcher Scholar – Economic Analysis

DINÂMIA'CET ***2020 – 2020***

Research scholarship to assess the impact of Portugal 2020 incentive system in SMEs financials. Data science projects using exploration data analysis, machine learning processes (Neural Networks, Random Forests and Lasso Regression) based on propensity score matching to isolate casual effects of public incentive programs on SME's revenues achieving a 97% predictive accuracy in identifying SME's positive impacts for a number of 300k SME's Portuguese companies. Architected policy-grade findings on capital allocation efficiency within the Portugal 2020 national investment framework.

Working Student – Economic Consultant

OLAE – LUSOPHONE OBSERVATORY OF ECONOMIC ACTIVITIES ***2018 – 2020***

Authored a Portugal – Taiwan bilateral Investment Guide for market-entry strategy. Engineered business plans for 4 approved multilateral financing projects (AfDB and World Bank frameworks) encompassing feasibility analysis, financial modelling, and risk-adjusted ROI projections. Led a research team investigating the macroeconomic impact of exchange rate volatility on Portuguese trade balances and export competitiveness.

EDUCATION

ISCTE Business School | M.Sc. In Economics | Grade 16 out 20 ***2019 – 2021***

Universität Wurzburg| European Macroeconomics | GPA: 2.2 out 5 (1=best; 5 = fail) ***2021 – 2021***

Lusophone University| B.Sc. In Economics | Grade: 16 out 20 ***2016 – 2019***

LANGUAGE, SKILLS & CERTIFICATES

Statistical Software & Programming Language: R, Python, SQL, GRETL, MATLAB, Julia

Finance Software: Bloomberg Terminal, BQL, BQuant

Writing Software: LaTeX, Markdown

Financial Modelling: Cash-Flow Model, Exit Multiple Model, Leveraged Buyout Model (LBO), 3-Statement Cash Flow Model

Risk and Regulatory Expertise: Basel III/IV, IFRS 9, IRB, MiCAR, DORA, SFDR, RWA Calculation, Stress Testing, EBA GL LoM, AQR asset review

Language: Portuguese (Native), English (C2), Spanish (B2), French (A1)

Certificates: Bloomberg Market Concepts, European Macroeconomics – Wurzburg

SELECTED DEAL SHEET & SUPERVISORY TRACK RECORD

1. Individual Provisioning (IFRS 9) across Diverse Portfolios Spearheaded comprehensive asset quality reviews focusing on Expected Credit Loss (ECL) calculation accuracy across diverse credit books.

- Corporate & Real Estate Portfolios (Up to €30Bn): Challenged structural deficiencies in valuation frameworks, revealing that independent appraisals were compromised and going-concern cash flows excluded CAPEX or operational PV analyses. Identified misalignments between Stage 3/NPE backstop definitions and CRR2 criteria. Result: Mandated ~€80M in direct provisioning uplift by enforcing proper valuation controls and cash flow DCF modeling instead of relying on generic EBITDA multiples.
- Cooperative and SME Books (Up to €700M): Granular review isolated systematic underestimation of ECL due to the absence of internal controls to aggregate economic group exposures and non-compliant collateral haircuts. Result: Demanded €28M in additional provisions and forced independent valuer rotations.

2. Collective Provisioning & Behavioral Modelling Led quantitative audits on retail and SME portfolios to validate the integrity of IFRS 9 collective estimation algorithms.

- Large Universal Bank (€46Bn Portfolio): Deconstructed behavioral maturity (BM) models on credit lines and current accounts. Proven that fixed 12/22-month horizons systematically understated maturity for revolving products, with over 85% of Stage 2 entries exceeding these thresholds. Overhauled the Pre-Payment Rate (PFR) universe estimation, demonstrating it included sales terminations and ignored vital Time-on-Book segmentation, which undermined marginal PD calculations. Result: Required recalibration of the collective model resulting in a €6M provisioning increase.

3. Credit Risk Management & Corporate Governance Assessed Overarching Risk Appetite Frameworks (RAF) and underwriting criteria for significant institutions facing material concentration risks.

- Income-Producing RE & Leveraged Finance (Up to €46Bn): Highlighted the critical absence of explicit financial guardrails (DSCR, ICR, D/E) within underwriting policies, showing excessive reliance on qualitative exception rules for land acquisitions and high-risk loans. Flagged that monitoring of LTV/LTC and early warning indicators was dangerously reactive (semi-annually instead of continuous triggers) and lacked a structured approach for imminent maturity walls or distressed refinancing. Result: Issued severe qualitative findings requiring total overhauls to credit granting governance.

4. Risk-Weighted Asset (RWA) Optimization and Benchmarking Executed critical capital adequacy validations under CRR2 for both Standardized Approach (SA) and Internal Ratings-Based (IRB) frameworks.

- Large International IRB Bank (€109Bn Portfolio): Identified regulatory breaches regarding the unapproved use of IRB frameworks into non-EEA zones. Analyzed PD/LGD calibration to find critical counterparty segmentation errors, particularly the misclassification of large corporates as SMEs to incorrectly extract RWA relief (SME support factor). Result: Enforced a €210M upward correction in RWA capital adequacy.
- Small Cooperative Networks (€2.5Bn): Conducted a complete replication of SA-RWA calculations across 5 institutions. Found misapplied LTV thresholds, incorrect immovable property categorizations (CRR2 Art. 124), and flawed Credit Conversion Factors (Annex I CRR2) on off-balance sheet items. Result: Triggered a €158M RWA uplift across the affected institutions.

Track Record Summary

Metric	Value
Total Inspections Conducted	11
Total Assets Under Review	~€282Bn+
Direct Provisioning Impact Identified	~€172M+
RWA Corrections Engineered	~€368M (€158M SA + €210M IRB)
Stage Reclassifications Forced	134 (across S1→S2, S1→S3, S2→S3)
MiCA Authorization Workflows Evaluated	4 (CASP / VASP / EMT applicants)
Multi-Asset Funds Addressed (ESG / SFDR & Risk)	5 Pension Funds (€8Bn AUM Total)
Multilateral Investment Projects Approved	4 (AfDB & World Bank frameworks)
Institutions Audited (size range)	€89M — €109Bn total assets
